Globally Networked Learning for a Planet in Peril: Where Do We Go Now?

Doreen Starke-Meyerring

Department of Integrated Studies in Education
McGill University, Montreal, Canada

10th COIL Conference, April 25-26, 2016 CUNY Graduate Center, NY.
We cannot solve our problems with the same thinking we used when we created them.

Albert Einstein
Failed Global Higher Education Consortia (Top Down)

- Fathom, 2000-2003 (Columbia University +14 other universities, libraries and museums): $25 million
- UK e-University, 2001-2004: $100 million
- Cardean University (Stanford, Carnegie Mellon, Columbia University, University of Chicago, London School of Economics), (folded into Ellis College): $100 million (Marginson, 2004)
Globally Networked Learning: Innovation Against All Odds

- Policies across nations (e.g. privacy, copyright)
- Policies at institutions (e.g., assessment policies)
- Technologies that defy international or inter-institutional collaboration
- Institutional performance evaluations that reflect the status quo and discourage innovation
- Support infrastructures designed around status quo of separate international and local classroom education (silo versus integrative approach); no support for cross-institutional or cross-national learning environments
- Large time investment (no support, negotiation of curriculum, overcoming contradictory policies, intense faculty development at the same time, daily time commitment, defeating constraining technologies)
Us Versus Them

“Us”—Local Classroom
